## Profile

---

I am in my final semester as a student at the University of West Attica, pursuing a Master's in Engineering (MEng) in Informatics and Computer Engineering. I am a passionate Junior Front-End developer specializing in React, with a strong foundation in creating responsive and intuitive user interfaces. I combine my technical knowledge with a keen eye for UX/UI design to create engaging and user-friendly applications. I am always trying to improve my skills in programming and in front-end technologies.

## Education

---

### University of West Attica

Master of Engineering (MEng) in Informatics and Computer Engineering

Athens, Greece

Sept. 2019 – Present

## Projects

---

### Apointly

React.js, Tailwindcss, Git, Figma

[Source Code](#)

This web application was created for a university group assignment. It's a booking appointment website that allows users to easily schedule appointments at stores like barber shops, nail salons etc. It also features an admin dashboard for store owners to manage appointments and monitor their store's performance.

- My responsibilities for this project included UX/UI design and front-end development.

### Grade Calculator

React.js, Tailwindcss, i18next, Git, Figma

[Source Code](#)

This web application was developed as a fun project to help you calculate your final grade at university or determine the score you need to pass a subject.

- My responsibilities for this project included UX/UI design and front-end development.

### Intelli

Kotlin, Jetpack Compose, Git, Figma

[Source Code](#)

This Android app was developed for a university group assignment. It's main purpose is to serve as a virtual assistant, helping users with everyday tasks such as checking the weather, scheduling appointments, online shopping, smart home management, and more.

- My responsibilities for this project included UX/UI design and front-end development.

### Sensation Music Player

Kotlin, Jetpack Compose, Git, Figma

[Source Code](#)

This Android app was developed for a university group assignment. It's a simple music player with file selection, playback controls, and background functionality.

- My responsibilities for this project included UX/UI design and front-end development.

## Technical Skills

---

<b>Languages</b>	: JavaScript, Typescript, Java, HTML, CSS
<b>Frameworks</b>	: React.js, Tailwindcss
<b>Libraries</b>	: Redux, React Router, Axios
<b>Databases</b>	: PostgreSQL
<b>Dev Tools</b>	: Visual Studio Code, Git, IntelliJ, Android Studio
<b>Other</b>	: Figma

## Languages

---

- Greek: Native Speaker
- English: Proficiency level C2 ECPE (Excellent knowledge)

## Military

---

Mandatory military service has not yet been completed and is deferred until 2028.
