## SUMMARY

I hold a Master's degree in Informatics and Computer Engineering from the University of West Attica and am actively seeking new opportunities to expand my skill set. Throughout my academic journey, I have developed a diverse range of technical skills with a strong focus on software development and system design. My proudest achievement is my thesis, where I built a full-stack social media web application centered on travel, utilizing modern front-end technologies and interactive design principles to create an engaging user experience. In addition, I have gained professional experience as an Accounting Assistant / Data entry specialist, where I worked extensively with digital systems, databases, and Excel, further strengthening my attention to detail, data accuracy, and ability to work in structured environments.

## EDUCATION

MEng in Informatics and Computer Engineering - University of West Attica

Oct 2019 - Mar 2025

## PROFESSIONAL EXPERIENCE

**Accounting Assistant / Data Entry Specialist**  
**THE FINANCIAL HISTORY - Athens, Greece**

2025

- Processed and recorded client invoices using accounting software and digital systems, ensuring accurate and timely data entry.
- Utilized Microsoft Excel for data organization, validation, and reporting.
- Gained experience in handling large datasets and working within structured digital environments.

**Freelance Web Developer**  
Self-employed – Remote

2023 – Present

- E-commerce Store for Tobacco Retailer - Vape&Shisha - — [vapeshishacy.com](http://vapeshishacy.com)**  
*WordPress / WooCommerce.* Developed a fully functional online store including responsive theme customization, product catalog setup, payment & shipping configuration, and basic SEO optimizations. Performed site testing and deployment, and provided the client with CMS training for product management.

## PROJECTS

### Levert

[Source Code](#)

Created and designed a full-stack project from scratch, combining features of travel sites with a social media aspect. It also includes a trip-planning feature powered by AI.

**Technologies used:** React, Redux, Axios, Tailwindcss, Spring Boot, PostgreSQL, Leaflet, Gemini AI, Figma, Azure Storage Browser.

### Apointly

[Source Code](#)

Created and designed the front end of this project—a booking appointment website that allows users to easily schedule appointments at stores such as barbershops with a admin dashboard for store owners to manage appointments and monitor their store's performance.

**Technologies used:** React, Tailwindcss, Figma.

## **Intelli**

[Source Code](#)

Created and designed the front end of this Android mobile application—a virtual assistant that helps users with everyday tasks.

**Technologies used:** Kotlin, Jetpack Compose, Figma.

## **Sensation Music Player**

[Source Code](#)

Created and designed the front end of this Android mobile application—a music player with all the essential functionalities.

**Technologies used:** Kotlin, Jetpack Compose, Figma.

## **SKILLS**

---

JavaScript, Java, HTML, CSS, React, Tailwindcss, Redux, React Router, Axios, PostgreSQL, Spring Boot, Kotlin, Jetpack Compose, Figma, C, C++, Linux

## **LANGUAGES**

---

**Greek:** Native Speaker

**English:** Proficiency level C2 ECPE (Excellent knowledge)
